

Part 1: The Technical Stack (10 Core Apps)

To work in Industry and Healthcare, you must master these apps in order of priority:

1. **Inventory (WMS):** Routes, Putaway rules, and **Lot/Serial traceability**.
 2. **Manufacturing (MRP):** Bills of Materials (BoM), Work Centers, and Routings.
 3. **Quality:** Control points, Checks (Pass/Fail, Measure), and Quality Alerts.
 4. **Purchase:** RFQs, Blanket Orders, and Vendor Lead Times.
 5. **Accounting:** Invoicing, Chart of Accounts, and **Asset Management**.
 6. **Maintenance:** Preventive and Corrective maintenance for factory machines.
 7. **PLM:** Engineering Change Orders (ECO) and Versioning.
 8. **Sales & CRM:** Quotation templates and multi-step sales flows.
 9. **Odoo Studio:** The "No-Code" tool for custom fields and PDF report editing.
 10. **Documents:** Centralizing SOPs (Standard Operating Procedures) and COAs (Certificates of Analysis).
-

Part 2: The Step-by-Step Training Roadmap

Phase 1: The Commercial Foundation (April)

- **Learning:** Basic Odoo navigation, Sales, and Purchasing.
- **Project 1: The Medical Distributor.**
 - **Goal:** Build a system for a company that buys and sells medical masks.
 - **Tasks:** Set up 5 products, create a Purchase Order (PO) to a supplier, receive the stock, and sell it to a "Hospital" customer.
 - **Key Skill:** Master the **Invoicing Policy** (Ordered vs. Delivered quantities).

Phase 2: The Supply Chain & Traceability (May)

- **Learning:** Advanced Inventory and Batch management.
- **Project 2: The Pharma Warehouse.**
 - **Goal:** Manage temperature-sensitive medications.
 - **Tasks:** Configure **Lot Tracking** and **Expiry Dates**. Set up a "Reordering Rule" so that when stock falls below 100 units, Odoo automatically emails the supplier.
 - **Key Skill:** Master **FEFO** (First Expiring, First Out) removal strategy.

Phase 3: The Factory Floor (June)

- **Learning:** Manufacturing (MRP) and Quality.
- **Project 3: The "Vitamin C" Lab.**
 - **Goal:** Produce a finished medicine from raw ingredients.
 - **Tasks:** Create a **Bill of Materials (BoM)** for "Vitamin C 500mg." Add a **Quality Check** that triggers during production: a technician must record the "Weight" of the tablet. If it's too light, the system must block the batch.
 - **Key Skill:** Managing **Work Centers** and labor costs.

Phase 4: The Specialist Edge (July)

- **Learning:** Studio, Maintenance, and Certification.
 - **Project 4: The Smart Industrial Plant.**
 - **Goal:** Digitize the maintenance of the "Tablet Press" machine.
 - **Tasks:** Use **Studio** to add a "Machine Serial Number" field to the Manufacturing order. Schedule a **Preventive Maintenance** task every 500 hours of machine use.
 - **Key Skill:** Using **Odoo Studio** to customize the user interface for specific industrial needs.
-

Part 3: The August Job-Hunt Strategy (Morocco Focus)

1. Build your "Portfolio Database"

Don't just send a CV. Host a free trial on Odoo.com named yourname-pharma-demo.odoo.com. During interviews, open your laptop and show the "Vitamin C Lab" project. This is your "Proof of Work."

2. Target the "Right" Companies

On LinkedIn, search for "**Odoo Gold Partners**" or "**Odoo Silver Partners**" in Morocco. Key names include:

- **DarbTech** (Rabat)
- **Smarp** (Casablanca)
- **Tech-IT** (Casablanca)
- **Macrofix** (Casablanca)

3. The "Winning" LinkedIn Message

*“Hello [Manager Name], I am a Bac+2 specialist in **Odoo Functional Consulting** with a focus on **Industrial MRP and Pharma Quality Control**. I have already developed a full traceability and production workflow in Odoo v18/v19. I am looking for a junior role to help your clients digitize their factory floors. Do you have 10 minutes for a quick demo of my work?”*

Month	Focus App	Outcome
April	Sales, Purchase, CRM	You can handle "Trading" companies.
May	Inventory (Advanced)	You can handle "Logistics" companies.
June	MRP & Quality	You can handle Factories & Labs .
July	Studio & Certification	You are a Techno-Functional Specialist .
August	APPLY	GET HIRED.
